MAGNASITE. Rose Marion, the editor of Wire-Sculpture.com, offers us her perspective of this versatile mineral and its uses to jewelry and lapidary artists. Read her full article on page 4!

## President's Message

Dear Members,

The holidays are getting close - and you can tell because Rock Currier, owner of Jewel Tunnel (the wholesale gem and mineral company), has once again invited the Pasadena Lapidary Society to join them at their holiday open house where we can enjoy shopping at discount prices. The date is November 17 from 10 AM to 4 PM at their warehouse at 13100 Spring Street in Baldwin Park.

Last year we had a very good time - relaxing, chatting and talking about the items on their shelves. This is where I found one of my favorite slabs - the agate with the "winking happy face".

Going to Jewel Tunnel is a perfect time to pick up a prize for the show raffle (it's not too early to think about it) - since each member or couple is asked to provide one prize item for the raffle. This can be something that you make or a nice item that you buy. Our day at Jewel Tunnel is a perfect opportunity to pick up a nice geode, fossil or crystal specimen. They also carry a selection

of fabricated jewelry and beads to make your own - at a wholesale discount!

Take advantage of the cooler weather on the two field trips this month! Read about them in this month's bulletin!

The holidays are just around the corner and that means a rockhounding trip for some of us and staying home with family for others. Whatever you do - I wish you and your family an enjoyable Thanksgiving!

..... *Marcia*

### October Board Meeting

by Linda Nelson, Secretary

Officers present: Marcia & Joe Goetz, Carolyn Duncan, & Linda Nelson.

Chairs & Members present: Vern & Sylvia Cliffe, Ed Imlay, Chris Kyte and Drew Wilson.

Vern Cliffe was approved as 3<sup>rd</sup> Trustee and Mark Nelson as Membership Chair. Linda revealed the 2013 ROTY and ballots were requested for the Junior Rockhound Of The Year voting. An expense allotment for the workshop was approved and

the subject of a workshop agreement was tabled.

### October Meeting

Members learned interesting tidbits of information about Opal from Hailey Carter at the Rock Of The Month presentation. Carolyn Duncan showed the first half of the Rhodochrosite video. Veteran member Ed Imlay said that it was probably the **BEST** video he has seen since becoming a member.

### November Meeting

Don't miss the November meeting where Carolyn Duncan will show

the second part of "**Rhodochrosite - Red Treasure of the Rockies**" This will introduce the Sweet Home Mine with interviews, underground footage, and computer animation to tell the entire story of the mine and its world-class Rhodochrosite.

Look for great raffle prizes and don't forget to avoid the dreaded "Badge Fines" by wearing your membership badge!

## Membership Information and Meeting Locations

**Membership** per calendar year is \$20, \$15 for a second adult member in the same house. Junior members and the third or more members at the same house are \$10. Initiation fee is \$2.50 per person and membership badges are \$7.50. Renewals are due by the October General Meeting and delinquent after December 31st. Mail checks for membership to P.O. Box 5025, Pasadena CA 91117-0025.

**Board Meetings:** 7:00 PM on the first Wednesday of the month at the One West Bank, 1 E. Foothill in Arcadia. All PLS members are welcome to attend.

**General Meetings:** 7:00 PM on the third Tuesday of each month at the Pasadena Central Library at 285 E. Walnut Street. **Guests are welcome!**

**Field Trips** are scheduled each month. Refer to the bulletin for date, location and information.

**Workshops** and instructions are offered in our well-equipped shop in Pasadena to all club members - normally on the 2nd Sunday of each month. Refer to the bulletin for hours and the calendar for date changes. Eye protection, closed-toe shoes and machinery safe practices

are mandatory for all participants. Call a board member for the workshop address.

Workshops and field trips are for adult members and children with direct parental supervision.

**The Annual Club Show** is held the second weekend of March at the Masonic Center, 3130 Huntington Drive, San Marino.

**Advertising** - a business card size ad is available for \$99 per year or \$10 per edition. Submit text, logos, business card or other copy to the editor at the address or email listed on this page.

**Ed's Corner**

**EDUCATIONAL OUTEACH**

**By Ed Imlay**

Chair, Education Committee

Ed Imlay at a local school

Rock Identification: Would you like to know the name of a rock you have acquired? Set it on the table at the rear of the meeting room with a note asking "What is this?". If the interior of the stone is not evident, chip a small piece off to reveal the interior (if it will not damage the appearance of the specimen).

For the November meeting, members can display any items of general interest - including workshop projects, material from locations of recent or upcoming field trips, and the birthstone of the month: **Topaz**. To schedule my interactive presentation to your child's school, contact me at (626) 286-8215 or at edimlay@hotmail.com for details.

**WORKSHOP**

**November Project** - Ed Imlay will instruct how to make a Bola Tie. The bola tie was designated the official neckwear of Arizona in 1973. A bola (sometimes called a bolo tie) is a type of necktie consisting of a piece of cord or braided leather with decorative metal tips secured with an ornamental clasp or slide. A silver bola tie adorned with turquoise (Arizona's state gemstone) is generally considered the official style, but bola ties come in a large variety of styles. Silversmith Victor Cedarstaff of Wickenburg, Arizona, claims to have invented the bolo tie in the late 1940's (and later patented his slide design) but it is also said that bola ties are a North American pioneer creation that dates back to between 1866 and 1886.

**Materials List:** Ed will provide all of the materials for this project but, if you want to bring your own, you will need: 1. A cabochon (30mm x 40mm is a good size), or other stone with a flat back. 2. A bola cord. 3. A bola slide. 4. A pair of bola tips. 5. Adhesive, such as super glue gel. **WARNING** - use safe procedures when working with adhesives. **Tools to bring:** A metal file.

The workshop date is on the calendar. Workshop hours are from 1:30 until 5PM. Parking is on the west side of street - please park compactly along the curb - allowing space for others to park behind you. Alternate parking is available next door to the workshop in a paved lot behind the buildings on Foothill Boulevard. Contact a member or call 909-996-1784 for workshop address and directions.

**THE SAN GABRIEL BEAD COMPANY**

*Create your own jewelry!*

325 E. Live Oak Ave.  
Arcadia CA 91006  
**(626) 447-7753**  
www.beadcompany.com

**Hours:** Tue-Thurs 12-9pm, Fri 12-6pm, Sat 10am-6pm, Sun 12-5pm

*beads, books, gourds, tools, workshops, metals & friendly advice*

**Welcome  
New Members !!**

Share the lapidary and jewelry hobby. Invite your friends and neighbors to one of our monthly meetings to learn more about the Pasadena Lapidary Society!

**ROCK OF THE MONTH PRESENTATION**

Each month our members have the opportunity to present a rock or mineral to the club at our monthly general meeting. Members are asked to volunteer to give a 5-minute presentation on a rock, mineral, or other item of lapidary or jewelry interest at the monthly meeting. This is open to both adult and junior members. Thanks to Mark Nelson for September's presentation of Zeolite and to Hailey Carter for presenting her perspective of Opal, the month's birthstone, at the October meeting. To be scheduled contact Carolyn Duncan.

It's time to renew our club membership! Send your check to the club at P.O. Box 5025 Pasadena, CA 91117-0025. This year, please sign up a spouse, child or friend! Rates are listed on page 2.

Our Historian, Jim Gersbach, is asking for photos and news articles about the club. Send them to him at 2270 E. Orange Grove, Pasadena, CA 91104-4911.

**Meeting Refreshments:** Thank you to Lisa Griffy, Ed & Corrine Imlay who brought the refreshments to the October meeting! Valerie Stathatos and Joan Harrison have volunteered for the November meeting. Contact Trudy Krose at (323) 664-9598 to offer your help!

**Make a note!** The December meeting will be at the Masonic Center, 3130 Huntington Drive, San Marino. There will be craft projects, a potluck dinner and a blind gift exchange. Contact Marcia to help!

Please keep Charlotte Bane in your thoughts and prayers this month as she undergoes hip replacement surgery on the 16<sup>th</sup>.

Drew Wilson and Bruce Towe lost a close friend and were unable to attend the workshop in their garage. A big thank-you to both of them for allowing the workshop to continue in their absence!

If you know anyone who is not feeling up to par, has been sick or lost a loved one? On the silver lining side of things, do you know who has achieved a goal, won a personal victory, or done something that deserves recognition? The Pasadena Lapidary Society has a Sunshine Committee to send cards and words of comfort and support and congratulations to those members who are in need or are deserving of it. Notify Trudy Krose at 323-664-9598 or by email at [mikekrose@roadrunner.com](mailto:mikekrose@roadrunner.com).

Rose Marion

# Magnesite

By Rose Marion

Magnesite is magnesium carbonate and is naturally a whitish color with brown or cream matrix (lines running through it). Some vendors have labeled magnesite as white buffalo turquoise or chalk turquoise, but magnesite isn't related to turquoise at all – it doesn't contain copper.

Gina Smith created this turquoise magnesite necklace and earring set with copper wire.

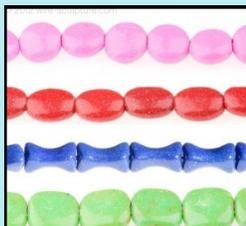

Marcia Hooten wrapped this Magnesite Square Necklace in sterling silver wire.

As you can see from the lovely jewelry featured in this article, while magnesite is naturally fairly colorless, it takes a dye phenomenally well. Dyed magnesite is one of the most popular ways to wear turquoise-looking jewelry at a fraction of the price.

There's nothing wrong with using dyed turquoise magnesite in your jewelry – just make sure your customer understands what they're buying.

Magnesite may also be heat-treated – possibly to stabilize the dye – but any magnesite jewelry material that has a turquoise color, or lime or pink as well, has been dyed. Magnesite that has been dyed often has a tiny amount of white dots on the surface.

A sampling of dyed Magnesite Beads, available on Wire-Sculpture.com

In magnesite that is intended to imitate turquoise, some bead manufacturers may employ a "crazing" method. Remember the craze effect on your aunt's teacups? Same idea: quickly heating and cooling the stones, possibly with dye, so that there's even more

"turquoise matrix" to appreciate. Again, there is nothing wrong with using treated magnesite, as long as all parties involved are aware!

Magnesite can be found all over the world, including the United States, Austria, and Brazil. It's best used in pendants and earrings, and I'd recommend against using it in rings and bracelets that would be bumped often. Natural magnesite is soluble in saltwater, so be sure not to wear your magnesite jewelry swimming! Magnesite is also fairly soft and scratchable, rating a 3.5 – 4.5 on Mohs scale. This is softer than real turquoise, which has a hardness of 5-6. If your magnesite is dyed, to protect the color, it's recommended you clean the jewelry with a cloth rather than dipping it in a cleaner or cleaning solution.

Metaphysically speaking, magnesite is prized for aiding in meditation. It is said to relax and soothe the mind, allowing a deeper experience. It is also said to open the heart chakra, help one to learn to love oneself, and raise self-esteem. A natural remedy for restless sleep is to place a piece of magnesite under your pillow – provided you don't have the sensitivity of a princess...!

Linda Barton wrapped this turquoise magnesite stone with copper wire and hung it on a necklace with copper and real turquoise beads.

Raw magnesite is often fluorescent - so if you go black-light bowling or to a fun Halloween party, this might be a fun jewelry piece to wear. However, before you make a special piece, test your magnesite under a black light, because the way that it's been cabbed or finished may have altered how it fluoresces.

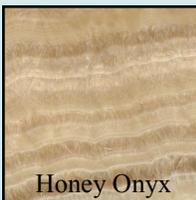

Editor: Rose Marion brings her experience as the owner of Heroine Jewelry Designs ([heroinejewelry.com](http://heroinejewelry.com)) to inspire amateur and professional jewelry artists. As the editor of Wire-Sculpture.com I have seen great features and tips that she has featured. I encourage all who read this article to enjoy similar articles of interest to lapidary and jewelry artists at Wire-Sculpture.com.

Last month Linda and I visited Navajo Indian artists near Gallup, NM, and confirmed that they are using magnesite with nickel in lieu of turquoise and silver in their more affordable jewelry.

This article was written by Rose Marion and is used with her express permission. The jewelry in the cover photo is by Lee Ann Reeves. Wire-Sculpture does not make any claim as to medical or beneficial properties of any of its stones.

### SPECIAL FIELD TRIP TO WHITTIER CLAIM AREA NOVEMBER 3<sup>RD</sup> & 4<sup>TH</sup>

We will join other local California Federation clubs on a popular field trip to the Whittier club's honey onyx claim. If you've seen the honey onyx you know that it is well worth the effort involved. We'll explore several different new collecting sites in the two days of our field trip. Most of us will arrive on Friday, November 2<sup>nd</sup>.

Honey Onyx

If you get there early enough on Friday you can go through Calico Ghost Town - not more than two miles away. Saturday evening's group dinner will be at Peggy Sue's 50's Diner!

**Meet:** There will be guided field trips on both Saturday and Sunday and we'll leave each day at 8:30 AM. from the parking lot of the Oak Tree Inn - 35450 Yermo Rd., Yermo, CA 92398.

**Materials:** Honey onyx, red moss agate, petrified wood & palm root, algae agate, other agates, jasp-agates, jaspers, fossils, etc.

**WHAT TO BRING:** Collecting bags or buckets, rock pick/hammer, small hand rake, walking stick, spray bottle and camera. Sledges, wedges, chisels & pry bars for those rockhounds who really want to get serious with their finds. Also layered clothing, hat, gloves, long pants, sturdy walking/hiking shoes or boots, sunscreen, sunglasses, bandanna, personal medications, first aid kit and whistle. Bring lunch and more drinking water than you think you can use - about one liter per hour of field time. This widespread field trip offers no shade. Gas and food are available in Yermo. Come with a full tank. High clearance vehicles, trucks or SUVs are highly recommended - as we will be driving over uneven dirt roads.

**Overnight Stay:** Camping in tent, car, trailer or motor home is available near the claim site. The access to the camp area requires unlocking a combination lock (combination is 4321), opening, closing and relocking the locked gate. Follow the "W", "P/W" or "PLS" signs to the level camping area. The Oak Tree Inn room rates start at \$55 (10% less for seniors and AAA). Phone: 760-254-1148. They have an Internet-website-only rate of \$46.75 at [www.oaktreeinn.com](http://www.oaktreeinn.com).

**There is a map on page 6 of this newsletter.** Please confirm with me if you are planning to attend so that I can keep you updated or notify you if the trip changes in any way. (626) 914-5030.

— Joe Goetz, Field Trip Coordinator

### SLAB SAWS AND MISTING PROBLEMS – A SOLUTION

by Vern and Sylvia Cliffe, Pasadena Lapidary Society

The use of slab saws to cut rocks creates the problem of mist that takes upwards of fifteen minutes after the cut before settling inside the hood. Opening the hood shortly after cutting exposes the operator to possible health problems and "coats" clothes and equipment. Many rockhounds elect to wait fifteen minutes before opening the hood, slowing production, especially during club workshops. Now a simple solution to the problem has surfaced!

While talking to our friend, Dan Stevens (of Caldwell, Idaho), he suggested an additive to the cutting oil that literally stops the misting. It's thick as honey and available from auto parts stores and Wal-Mart. The product is "No Smoke + Stopleak", made by Bardahl. Dan adds ½ cup to his 18" and 24" saws.

So, Rockhounds, you can get back to production cutting. I guess for every problem, there's a solution!

Sunday, November 4<sup>th</sup>, 2012  
Though mentioned by Benjamin Franklin in 1784, the modern idea of daylight saving was first proposed in 1895 by George Vernon Hudson and it was implemented during the First World War. Many countries have used it at various

times since then.

The practice has been both praised and criticized. Adding daylight to evenings benefits retailing, sports and other activities that exploit sunlight after working hours, but can cause problems for evening entertainment and other occupations tied to the sun. Although an early goal of DST was to reduce evening usage of incandescent lighting (formerly the primary use of electricity), modern lighting, heating and cooling usage patterns differ greatly and research about how DST currently affects energy use is limited or even contradictory. Arizona does not recognize DST. – Wikipedia

**FIELD TRIPS**

By Joe Goetz

Joe Goetz  
Field Trip Chairman

**STONEWALL PASS  
NOVEMBER 22<sup>ND</sup> - 25<sup>TH</sup>**

This month's field trip will take advantage of the long Thanksgiving Week holiday to visit sites around Stonewall Pass, Nevada. This field trip will bring us to ghost towns and unique collecting sites. Stonewall Pass is located half way between Tonopah and Beatty on U.S. 95. **Because of the distance and coordination involved, I need all who are planning to attend this field trip to confirm with me by Wednesday, November 14<sup>th</sup> at (626) 914-5030 or joenmar1@verizon.net. DO NOT SHOW UP WITHOUT TALKING WITH ME.**

**What To Collect:** Petrified wood, fluorescent chalcedony, wood casts, agate, jasper, apache tears and petrified pumice. The Great Beatty Mudmound has a fantastic abundance of Middle Ordovician fossils in a geologic rock formation geologists call the Antelope Valley Limestone.

**Meet:** We will meet each morning at 8:30am (beginning on Thursday, November 22<sup>nd</sup>), outside of the lobby of the Motel 6 in Beatty.

**WHAT TO BRING:** Collecting bags or buckets, rock pick/hammer, small hand rake, walking stick, spray bottle and camera. Sledges, wedges, chisels and pry bars for those rockhounds who really want to get serious with a special find. Bring layered clothing, hat, gloves, long pants, sturdy walking/hiking shoes or boots, sunscreen, sunglasses, bandanna, personal medications, first aid kit and whistle. Bring lunch and more drinking water than you think you can use - about one liter per hour of field time. This widespread field trip offers no shade. High clearance vehicles, trucks or SUVs are highly recommended as we will be driving over uneven dirt roads. Gas and food available in Beatty. Come with a full tank.

**Overnight Stay:** There are several motels, hotels and casinos in Beatty. Two we can list are the Motel 6 Beatty, (775) 553-9090 with a rate of \$58.99 (less 10% for Seniors and AAA), and the Atomic Inn at \$49.75 with similar discounts (775)553-2263. Camping in tent, car, trailer or motor home is available at Bailey's Hot Springs Phone (775) 553-2395. Find others at [www.rvparkreviews.com/regions/Nevada/Beatty](http://www.rvparkreviews.com/regions/Nevada/Beatty). Primitive camping near the pass is at the junction of US 95 and NV 266. Call Sheriff Stone of the Gold Point Ghost Town at (775) 482-4653 or [www.goldpointghosttown.com](http://www.goldpointghosttown.com) for recommendations.

Look for this symbol on the calendar on page 8.

"Wrong Way Joe" zteOG eoJ

*Newsletter*

**Editor's Quiz**

**Juniors:** Collecting rock specimens at night can be aided by a full-moon (see the calendar on page 8).

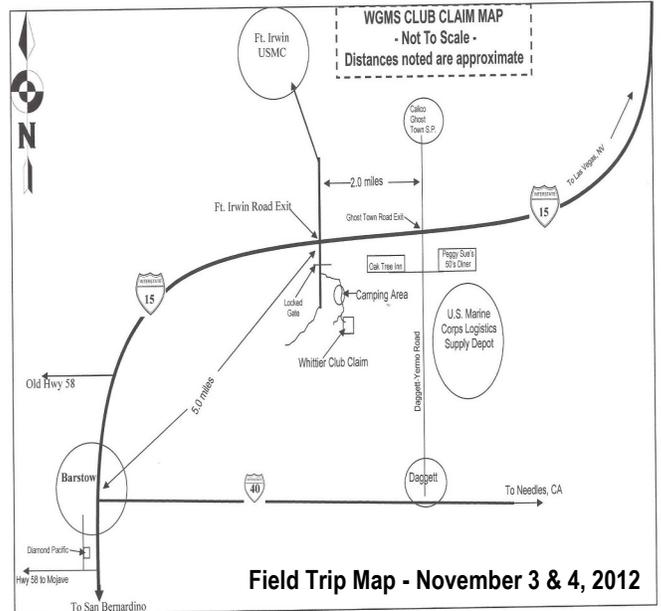

**A:** How many times brighter is the moon this night than a half-moon?

**B: Bonus:** When is the half moon in November?

**Adults:** a. Name one of the two minerals, besides iron, that strongly display magnetic properties.  
b. Name the other one.

**FEDERATION NEWS**

**CFMS - California Federation of Mineralogical Societies**

**AFMS - American Federation of Mineralogical Societies**

**MARIPOSA, CA - September 30, 2012** — Armed robbers may have made off with as much as \$2 million in gold and gems from the California State Mining and Mineral Museum in Mariposa, a parks spokesman said.

A statewide hunt was on for the robbers and the possible loot Saturday after the Friday afternoon robbery. About 4 p.m., multiple robbers dressed entirely in black and wearing face masks and night goggles broke in and threatened a museum curator and a museum guide with what were described to police as pickaxes.

They herded employees into the far end of the faux-mine museum building, then went after the famed Fricot Nugget, an almost 14-pound swirl of crystalline gold believed to be the biggest chunk to survive the Gold Rush, said state parks spokesman Roy Stearns. The suspects are still at large.

By Diana Marcum, Los Angeles Times

**FARRIN O'CONNOR  
DESIGN**

146 W. Bellevue Drive, Pasadena

This is a true "hidden gem" for those interested in lapidary and jewelry work. A fully-stocked store with books, tools, beads and findings awaits you. Learn how to make jewelry from nothing-to-finished in their one-day classes. See upcoming classes and instructors at

[www.farrinoconnordesign.com/classes](http://www.farrinoconnordesign.com/classes)

Or call them at (626) 796-5300. Free fenced parking.

PS: Many years ago members donated a main prize they had personally made while attending the club workshop plus working at home. With the workshop fully operational and available for ideas and for assembly with assistance from experienced members, maybe that could happen for the show next March ! — Sylvia Cliffe

Editor's Quiz: Paolo Sanchez correctly identified the founding date of our club and won a piece of Arizona petrified wood and an iridescent mineral from Rocks & Runes. Becky Fregoso identified the properties of the mineral Halite and won a knotty piece of petrified wood. Thanks to all who responded!

FAMOUS ELECTION YEAR QUOTES

"We hang the petty thieves and appoint the great ones to public office." - Aesop, Greek slave and fable author - 620 BC.

"Politicians are the same all over. They promise to build a bridge even where there is no river." - Nikita Khrushchev, Russian Soviet politician.

"The problem with political jokes is they get elected." - Will Rogers, American cowboy and humorist.

Photographs not credited are from the public domain and are used for educational purposes. Articles and photographs submitted for publication are welcome and must be received by the 15th of the prior month. The editor reserves the right to edit any article submitted for publishing.

YOU KNOW YOU'RE A ROCKHOUND IF.....

You are convinced that buried deep in some secret government archive is a document that will conclusively prove that the entire US Apollo space program was conceived and developed for the sole purpose of getting a moon rock for a certain Presidential rock collection.

Prescott Gem and Mineral Society 10/12

You might be a Rockhound if .....

- You think road cuts are built as tourist attractions
- You describe your vacations by the rocks you brought home.
- The rock pile in your garage is over your head.
- Your PC screen saver features pictures of rocks.
- You find rocks when you empty your pockets at night.
- You went to a rock festival and you hate music.
- You gave rocks, tumblers, or rock tools for Christmas.
- You can find Quartzsite on a map in less than 5 seconds.
- When friends say they're going to Tucson, you assume it'll be in February.
